Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of North Star Charter School, Inc. (the Charter), as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the Charter's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Basis for Qualified Opinion on Governmental Activities

Management has not performed the actuarial calculations for other post-employment benefits for the governmental activities and, accordingly, has not considered the Charter's other post-employment benefit liability. Accounting principles generally accepted in the United States of America require that a liability be recorded for other post-employment benefits, which would decrease net assets, increase liabilities, and increase expenses in the governmental activities. The amount by which this departure would affect net assets, liabilities, and expenses in the governmental activities is not reasonably determinable.

Qualified Opinion

In our opinion, except for the effects of the matter described in the "Basis for Qualified Opinion on Governmental Activities" paragraph, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities of North Star Charter School, Inc., as of June 30, 2016, and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Unmodified Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of each major fund and the aggregate remaining fund information of North Star Charter School, Inc., as of June 30, 2016, and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the budgetary comparison information, schedule of the Charter's proportionate share of the Net Pension Liability, and schedule of Charter contributions on pages 33 to 37 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with

sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management’s discussion and analysis that accounting principles generally accepted in the United State of America require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise North Star School, Inc.’s basic financial statements. The supplemental schedule of expenditures by object of expenditure – budget (GAAP basis) and actual – General fund and combining nonmajor fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The schedule of expenditures by object of expenditure – budget (GAAP basis) and actual – General fund and combining nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, schedule of expenditures by object of expenditure – budget (GAAP basis) and actual – General fund and the combining nonmajor fund financial statements are fairly stated in all material respects in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated September 19, 2016, on our consideration the Charter’s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Charter’s internal control over financial reporting and compliance.

Reconciliation of the Balance Sheet of the Governmental Funds
to the Statement of Net Position
June 30, 2016

Total Fund Balances - Governmental Funds \$ 420,849

Amounts reported for governmental activities in the Statement of Net Position are different because of the following:

Capital assets used in governmental activities are not financial resources and, therefore, are not reported in governmental funds. Those assets consist of:

Land	\$ 1,162,200	
Buildings, Net of \$1,050,699 Accum. Depreciation	5,093,727	
Improvements, Net of \$423,453 Accum. Depreciation	1,163,043

Total Capital Assets		7,739,566

Long-term liabilities, including bonds payable, are not due and payable in the current period and, therefore, are deferred in the funds. Long-term liabilities at year end consist of:

Accrued Interest on Long-term Debt	\$ (841,858)	
Bonds Payable	<u>(12,143,156)</u>	
Total Long-Term Debt		(12,985,014)

The District participates in the Public Employer Retirement System of Idaho, which is a cost-sharing plan. As a participant they are required to report their share of the Net Pension Liability and the related deferred inflows and outflows on their Statement of Net Position.

 Reconciliation of the Statement of Revenues,
 Expenditures, and Changes in Fund Balances of the
 Governmental Funds to the Statement of Activities
 For the Year Ended June 30,2016

Total Net Change in Fund Balance - Governmental Funds \$ (96,089)

Amounts reported for governmental activities in the Statement of Activities are different because of the following:

Capital outlays are reported in governmental funds as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their useful lives as depreciation expense. In the current period, these amounts are:

Capital Outlay	\$ 140,614	
Depreciation	<u>(274,751)</u>	(134,137)

Accrued interest on long-term debt (309,585)

Debt proceeds are reported as financing sources in governmental funds and thus contribute to the change in fund balance. In the Statement of Net position, however, issuing debt increases long-term liabilities and does not affect the Statement of Activities. Similarly, repayment of debt is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position.

Bonds Payable -

The District participates in the Public Employer Retirement System of Idaho, which is a cost-sharing plan. As a participant they are required to report their share of the Net Pension Liability and the related deferred inflows and outflows on their Statement of Net Position. 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

North Star Charter School, Inc. (the Charter) was organized on May 14, 2002, and is governed by a Board of Directors, which has responsibility and control over all activities related to public school education within the Charter. The accompanying financial statements present the activities of the Charter. The Charter receives funding from local, state, and federal government sources and must comply with all of the requirements of these funding source entities. However, the Charter is not included in any other governmental reporting entity as defined by generally accepted accounting principles. Board members have decision-making authority, the power to designate management, the ability to significantly influence operations, and the primary accountability for fiscal matters. In addition, the Charter's reporting entity does not contain any component units as defined in Governmental Accounting Standards.

B. Basis of Presentation, Basis of Accounting

Basis of Presentation

Government-wide Statements: The Statement of Net Position and the Statement of Activities display information about the financial activities of the Charter. Eliminations have been made to minimize the double counting of internal activities. Governmental activities generally are financed through intergovernmental revenues and other nonexchange transactions.

The Statement of Activities presents a comparison between direct expenses and program revenues for each function of the Charter's governmental activities.

- Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function.
- Indirect expenses—expenses of the general government related to the administration and support of the Charter's programs, such as personnel and accounting (but not interest on long-term debt)—are allocated to programs based on their percentage of total primary government expenses. Interest expenses are allocated to the programs that manage the capital assets financed with long-term debt.
- Program revenues include (a) charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all state formula aid, are presented as general revenues.

Fund Financial Statements: The fund financial statements provide information about the Charter's funds. The emphasis of fund financial statements is on major governmental funds, each displayed in a separate column. All remaining

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

governmental funds are aggregated and reported as nonmajor funds.

The Charter reports the following major governmental funds:

- *General fund.* This is the Charter's primary operating fund. It accounts for all financial resources of the Charter, except those required to be accounted for in another fund.
- *School Building Maintenance fund.* This fund accounts for the resources received and used to maintain the school building.
- *Debt Service fund.* This fund accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental activities.

•

The Charter reports the following fiduciary fund types:

- *Employee Flex Trust fund.* This fund reports a trust arraignment under which principal and income benefit the employees flex accounts.
- *Student Activity agency fund.* This fund accounts for assets held by the Charter as an agent for various student groups and clubs.

Basis of Accounting

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the Charter receives value without directly giving equal value in return, include grants and donations. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The Charter considers all revenues reported in the governmental funds to be available if they are collected within sixty days after year-end. Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, and claims and judgments, which are recognized as expenditures to the extent they have matured.

General capital asset acquisitions are reported as expenditures in governmental funds. Transfers, proceeds of general long-term liabilities, and acquisitions under capital leases are reported under other financing sources and uses.

Fund Balance Reporting and Governmental Funds

Different measurement focuses and bases of accounting are used in the government-wide Statement of Net Position and in the governmental fund Balance Sheet.

The Charter uses the following fund balance categories in the governmental fund Balance Sheet:

- *Nonspendable*. Balances, for example, in permanent funds, prepaid expenditures, and inventories that are permanently precluded from conversion to cash.
- *Restricted*. Balances constrained to a specific purpose by enabling legislation, external parties, or constitutional provisions.
- *Unassigned*. Balances available for any purpose.

The remaining fund balance classifications (committed and assigned) are either not applicable or no formal policy has yet been established to be able to utilize such classifications of fund balance. However, if there had been committed funds, these amounts would have been decided by the Board of Directors, the Charter's highest level of decision making authority, through a formal action. The Board of Directors would also have the authority to assign funds or authorize another official to do so.

Under the terms of grant agreements, the Charter funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net position or fund balance available to finance the program. When both restricted and unrestricted resources are available for use, it is the Charter's intent to use restricted resources first, then unrestricted resources as they are needed.

There is also no formal policy regarding the use of committed, assigned, or unassigned fund balances. However, it is the Charter's intent that when an expenditure is incurred for purposes for which amounts in any of the unrestricted classifications of fund balance could be used, the Charter considers committed amounts to be reduced first, followed by assigned amounts, and then unassigned amounts.

All special revenue funds are restricted by private outside parties, the federal government, or the State of Idaho and must be spent according to the stipulations of the private outside party or the corresponding federal or state program.

C. Assets and Liabilities

Cash Equivalents

The Charter requires all cash belonging to the Charter to be placed in custody of the Business Manager. A "Pooled Cash" concept is therefore used in maintaining the cash and investment accounts in the accounting records. Under this method, all cash is pooled for investment purposes and each fund has equity in the pooled amount. The Charter considers all highly liquid investments with an original maturity date of three months or less to be cash equivalents. See Note 2.

Receivables

All trade and intergovernmental receivables are shown net of an allowance for uncollectibles. The Charter believes all receivables are collectible, thus no allowance has been established.

Capital Assets

Capital assets are reported at actual or estimated historical cost based on appraisals or deflated current replacement cost. Contributed assets are reported at estimated fair value at the time received.

Capitalization thresholds (the dollar value above which asset acquisitions are added to the capital asset accounts), depreciation methods, and estimated useful lives of capital assets reported in the government-wide statements are shown below.

	<u>Capitalization Policy</u>	<u>Depreciation Method</u>	<u>Estimated Useful Life</u>
Buildings and Improvements	\$ 2,500	Straight-line	15-50 years
Equipment	\$ 2,500	Straight-line	2-20 years

An exception to the capitalization threshold includes assets acquired with debt. All of these assets are to be capitalized, regardless of cost.

Depreciation is used to allocate the actual or estimated historical cost of all capital assets over their estimated useful lives.

The Charter has no infrastructure to report.

Compensated Absences

The Charter provides vacation time to the full-time certified employees. The estimated amount of compensation for further amounts is believed to be immaterial and accordingly no liability has been recorded.

Accounts Payable

Accounts payable represent debts that will be paid in the next billing cycle. Accounts payable are not over 60 days past due.

Pensions

For purposes of measuring the net pension liability and pension expense, information about the fiduciary net position of the Public Employee Retirement System of Idaho Base Plan (Base Plan) and additions to/deductions from Base Plan's fiduciary net position have been determined on the same basis as they are reported by the Base Plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. CASH

Deposits

As of June 30, 2016, the carrying amount of the Charter's deposits was \$595,879 and the respective bank balances totaled \$608,829. \$500,000 of the bank balance was insured or collateralized with pooled securities held by the pledging institution in the name of the Charter.

2. CASH (continued)

Custodial Credit Risk – Deposits

Custodial credit risk is the risk that in the event of a bank failure, the Charter's deposits may not be returned. As of June 30, 2016, \$108,829 of the Charter's deposits were not covered by federal depository insurance or by collateral held by the Charter's agent or pledging financial institution's trust department or agent in the name of the Charter, and thus were exposed to custodial credit risk. The Charter does not have a formal policy limiting its exposure to custodial credit risk.

Investments

The Charter follows Idaho Statute that outlines qualifying investment options as follows:

Idaho Code authorizes the Charter to invest any available funds in obligations issued or guaranteed by the United States Treasury, the State of Idaho, local Idaho municipalities and taxing districts, the Farm Credit System, or Idaho public corporations, as well as time deposit accounts and repurchase agreements.

However, the Charter did not have any investments as of June 30, 2016.

At year-end, the cash accounts were reported in the basic financial statements in the following categories:

	Governmental Activities	Fiduciary Funds	Total
Cash and Cash Equivalents	\$ 163,302	\$ 151,053	\$ 314,355
Restricted Cash	281,524	-	281,524
	<u>\$ 444,826</u>	<u>\$ 151,053</u>	<u>\$ 595,879</u>

3. CONTINGENT LIABILITIES

Amounts received or receivable from grantor agencies are subject to audit and adjustment. The amount, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the Charter expects such amounts, if any, to be immaterial.

10. LONG TERM DEBT

Revenue Refunding Bonds

North Star Charter School, Inc. issued nonprofit facilities revenue bonds series 2009 in the amount of \$11,775,000 in March 2009. The bond proceeds were used to finance the construction of school facilities. Interest rates ranged from 9.00% to 10.25%. North Star Charter School, Inc. was not in compliance with some of the bond covenants and faced difficulties with debt service, and consequently these bonds were called in May 2014 and refunded by issuance of the following refunding bonds:

Series 2014A Nonprofit Facilities Revenue Refunding Bonds

Series 2014 B Nonprofit Facilities Revenue Refunding Capital Appreciation Subordinate Bonds

Series 2014 C Nonprofit Facilities Revenue Refunding Bonds

These bonds are secured by virtually all assets of North Star Charter School Inc. The Series 2014A and 2014C bonds are secured on a parity basis. The Series 2014B bonds were issued junior and subordinate to the other bonds.

The reacquisition price exceeded the net carrying amount of the old debt and accrued interest by \$128,775. This amount was paid out as issuance costs. The new debt issue results in an increase in future debt service requirements of approximately \$18,241,000 due in large part to compounding interest and no payments being required for the Series 2014B bonds until 2049. The new debt issues resulted in an economic gain of approximately \$4,440,000.

The first bond interest payments, on the Series A and Series C bonds, were due January 1, 2015 and subsequent payments are due each July 1 and January 1. The first bond principal payments, on the Series A and Series C bonds, is due July 1, 2016 and are due each July 1 thereafter.

The Series B bonds require no principal or interest payments until maturity in the year 2049. As a result, the Series B bonds will have no cash flow impact on operations until their maturity date.

12. PENSION PLAN

Plan Description

North Star Charter School, Inc. contributes to the Base Plan which is a cost-sharing multiple-employer defined benefit pension plan administered by Public Employee Retirement System of Idaho (PERSI or System) that covers substantially all employees of the State of Idaho, its agencies and various participating political subdivisions. The cost to administer the plan is financed through the contributions and investment earnings of the plan. PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

Responsibility for administration of the Base Plan is assigned to the Board comprised of five members appointed by the Governor and confirmed by the Idaho Senate. State law requires that two members of the Board be active Base Plan members with at least ten years of service and three members who are Idaho citizens not members of the Base Plan except by reason of having served on the Board.

12. PENSION PLAN (continued)

Employee membership data related to the PERSI Base Plan, as of June 30, 2016 was as follows:

Retirees and beneficiaries currently receiving benefits	42,657
Terminated employees entitled to but not yet receiving benefits	11,859
Active plan members	<u>67,008</u>
	<u>121,524</u>

The Base Plan provides retirement, disability, death and survivor benefits of eligible members or beneficiaries. Benefits are based on members' years of service, age, and

The benefit payments for the Base Plan are calculated using a benefit formula adopted by the Idaho Legislature. The Base Plan is required to provide a 1% minimum cost of living increase per year provided the Consumer Price Index increases 1% or more. The PERSI Board has the authority to provide higher cost of living increases to a maximum of the Consumer Price Index movement or 6%, whichever is less; however, any amount above the 1% minimum is subject to review by the Idaho Legislature.

Member and Employer Contributions

Member and employer contributions paid to the Base Plan are set by statute and are established as a percent of covered compensation and earnings from investments. Contribution rates are determined by the PERSI Board within limitations, as defined by state law. The Board may make periodic changes to employer and employee contribution rates (expressed as percentages of annual covered payroll) if current rates are actuarially determined to be inadequate or in excess to accumulate sufficient assets to pay benefits when due.

The contribution rates for employees are set by statute at 60% (72%) of the employer rate. As of June 30, 2016 it was 6.79% (8.36%). The employer contribution rate is set by the Retirement Board and was 11.32% (11.66%) of covered compensation. North Star Charter School, Inc.'s contributions were \$332,467 the year ended June 30, 2016.

Pension Liabilities, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2016, North Star Charter School, Inc. reported a liability for its proportionate share of the net pension liability. The net pension liability was measured as of July 1, 2015, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. North Star Charter School, Inc.'s proportion of the net pension liability was based on North Star Charter School, Inc.'s share of contributions in the Base Plan pension plan relative to the total contributions of all participating PERSI Base Plan employers. At July 1, 2015, North Star Charter School, Inc.'s proportion was 0.0958135 percent.

For the year ended June 30, 2016, North Star Charter School, Inc. recognized pension expense of \$251,426. At June 30, 2016, North Star Charter School, Inc. reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual	\$ -	\$ 151,252
Changes in assumptions or other inputs	45,949	-
Net difference between projected and actual earnings on pension plan investments	464,344	662,568
Changes in the employer's proportionate share	108,719	-
North Star Charter School, Inc.'s contributions subsequent to the measurement date	332,467	-
Total	\$ 951,479	\$ 813,820

\$332,467 reported as deferred outflows of resources related to pensions resulting from Employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending June 30, 2016.

The average of the expected remaining service lives of all employees that are provided with pensions through the System (active and inactive employees) determined at July 1, 2013, the beginning of the measurement period ended June 30, 2014, is 5.6 years.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (revenue) as follows:

Actuarial Assumptions

Valuations are based on actuarial assumptions, the benefit formulas, and employee groups. Level percentages of payroll normal costs are determined using the Entry Age Normal Cost Method. Under the Entry Age Normal Cost Method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated as a level percentage of each year's earnings of the individual between entry age and assumed exit age. The Base Plan amortizes any unfunded actuarial accrued liability based on a level percentage of payroll. The maximum amortization period for the Base Plan permitted under Section 59-1322, Idaho Code, is 25 years.

The total pension liability in the July 1, 2015 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.25%
Salary increases	4.5 – 10.25%
Salary inflation	3.75%
Investment rate of return	7.10%, net of investment expense
Cost-of-living	1%

Mortality rates were based on the RP – 2000 combined table for healthy males or females as appropriate with the following offsets:

1. Set back 3 years for teachers
2. No offset for male fire and police
3. Forward one year for female fire and police
4. Set back one year for all general employees and all beneficiaries

An experience study was performed in 2012 for the period July 1, 2007 through June 30, 2011 which reviewed all economic and demographic assumptions other than mortality. Mortality and all economic assumptions were studied in 2014 for the period from July 1, 2009 through June 30, 2013. The Total Pension Liability as of June 30, 2015 is based on the results of an actuarial valuation date of July 1, 2015.

The long-term expected rate of return on pension plan investments was determined using the building block approach and a forward-looking model in which best estimate

ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the System relies primarily on an approach which builds upon the latest capital market assumptions.

Specifically, the System uses consultants, investment managers and trustees to develop capital market assumptions in analyzing the System's asset allocation. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of System's assets.

The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. The capital market assumptions are as of January 1, 2014.

12. PENSION PLAN (continued)

Discount Rate

The discount rate used to measure the total pension liability was 7.10%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plans' net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for pension plan administrative expense.

Sensitivity of the Employer's proportionate share of the net pension liability to changes in the discount rate.

The following presents the Employer's proportionate share of the net pension liability calculated using the discount rate of 7.10 percent, as well as what the Employer's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.10 percent) or 1-percentage-point higher (8.10 percent) than the current rate:

	1% Decrease (6.10%)	Current Discount Rate (7.10%)	1% Increase (8.10%)
Employer's proportionate share of the net pension liability (asset)	\$ 3,073,062	\$ 1,261,708	\$ (244,193)

Pension plan fiduciary net position

Detailed information about the pension plan's fiduciary net position is available in the separately issued PERSI financial report.

PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

1. BUDGETS AND BUDGETARY ACCOUNTING

The Charter follows these procedures in establishing the budgetary data reflected in the financial statements in future years:

- A. Prior to June 1, the Finance Director and the Board of Directors prepare a proposed operating budget for the fiscal year commencing the following July 1. The operating budget includes proposed expenditures and the means of financing them.
- B. Public hearings are conducted to obtain taxpayer comments.
- C. Prior to July 1, the budget is legally enacted through passage at a board meeting.
- D. Formal budgetary integration is employed as a management control device during the year for all the funds.
- E. Budgets for the governmental funds are adopted on a basis consistent with generally accepted accounting principles (GAAP).
- F. Budgeted amounts are as originally adopted, or amended by the Board of Directors.

Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Board of Directors
North Star Charter School, Inc.
Eagle, Idaho

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of North Star Charter School, Inc., as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise North Star Charter School, Inc.'s basic financial statements and have issued our report thereon dated September 19, 2016.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered North Star Charter School, Inc.'s internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of North Star Charter School, Inc.'s internal control. Accordingly, we do not express an opinion on the effectiveness of North Star Charter School, Inc.'s internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether North Star Charter School, Inc.'s financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
